BT-BC 10 E Battery charger

Art.-No. 10.508.50

Robust 12 V electronic battery charger. It is equipped with ammeter for control of the charging progress showing the respective charging amperage. The strong pole clips warrants an optimal connection to the pole tips of the battery. With the carrying handle it can be comfortably transported.

The electronic charging control limits the charging voltage at 14.1 V (WU-charging curve). Overloading the connected battery is therefore not possible and the charging procedure does not have to be supervised. The battery charger is ideal for maintenance-free batteries and also for topping up seldom used batteries.

Features

- All-insulated construction
- Electronic charging
- Sheet steel housing
- Carrying handle (1)
- Built-in ammeter (2)
- Overload- and false poling- and short-circuit protection
- Mains cable with europe plug
- Charging leads with sturdy pole clamps (3)

Technical data

- | | |
|----------------------------|-----------------------------|
| ■ Mains voltage: | 230 V ~ 50 Hz |
| ■ Charging voltage: | 12 V |
| ■ Charging rate: | 7.1 A arithm. / 10 A eff. |
| ■ For lead batteries from: | min. 5 Ah up to max. 200 Ah |
| ■ Weight: | 3.1 kg |
| ■ Packing dimensions: | 215 x 190 x 125 mm |
| ■ Bar code: | 4006825 100884 |
| ■ Sales unit: | 6 pcs |
